(54) Title: TOTAL HARMONIC DISTORTION REDUCTION FOR ELECTRONIC DIMMING BALLAST

(57) Abstract: A ballast employs an inverter output stage and a power factor correction input stage, which applies a regulated DC voltage as a function of a line voltage to the inverter output stage. The power factor correction input stage includes a power factor correction integrated circuit and a line voltage sensing circuit, which applies a clamped rectified voltage to the power factor correction integrated circuit. The clamped rectified voltage is a function of a load being applied by the inverter output stage to the power factor correction integrated circuit.
